

Correction

Easthall C, Song F, Bhattacharya D. A metaanalysis of cognitive-based behaviour change techniques as interventions to improve medication adherence. *BMJ Open* 2013;3:e002749. In the process of preparing this material for inclusion in a doctoral thesis, the following minor errors were noted:

- ▶ Remien study (tables 1 and 2) – the correct sample size is 215; data were, however, entered correctly.
- ▶ Van Es study (table 2) – the correct sample sizes for the intervention and control group are 33 and 34 respectively; data were, however, entered correctly.
- ▶ Pradier and Wagner studies – sample size errors were included in the meta-analysis which means slightly different effect sizes were obtained for these studies as summarised in table 1 below which highlights that the erroneous data have made very minor changes to the effect sizes calculated.
- ▶ The overall effect size for all studies remains unchanged at 0.34 (0.23 to 0.46).

Summary of changes to sample sizes and effects sizes

		Pradier <i>et al</i>	Wagner <i>et al</i>
Original data included in paper	Total sample size	202	135
	Intervention group	123	154
	Control group	121	76
	Effect size	0.34 (0.02, 0.65)	–0.08 (–0.35, 0.20)
Updated (correct) data	Total sample size	202	145
	Intervention group	100	97
	Control group	102	48
	Effect size	0.29 (0.01, 0.57)	–0.10 (–0.45, 0.25)
