- ☐ Yes
- ☐ No

If you answered yes to the above question, what year did you become accredited to conduct medication management reviews? (YYYY)

_____

How many months were you working in the medical centre (including lead in phase)?

_____

How much do you feel a practice pharmacist should be remunerated (per hour) for the services provided?

$_____

With regards to your experience as the practice pharmacist working within a medical centre please indicate the extent to which you agree or disagree with the following statements:

	Strongly Disagree	**Disagree**	**Neither Agree or Disagree**	**Agree**	**Strongly Agree**
I enjoyed working as a practice pharmacist in a medical centre					
I did not feel part of the medical centre team					
The GPs were not supportive of my role as the practice pharmacist					
I believe that the GPs in the medical centre would not be accepting of a long-term practice pharmacist service					
The one month lead in time was important to help establish relationships in the medical centre					
The one month lead in phase was not enough time to integrate into the medical centre					
I did not have enough time with the patient to discuss their medicines and problems.					
Having a practice pharmacist in a medical centre improved communication with community pharmacies					
Pharmacists should have a more active role in the general practice environment					
Being co-located with GPs and other allied health was beneficial					
Having access to patient medical notes was beneficial					
Working as a practice pharmacist was professionally satisfying					
This is an area of healthcare which I would like to practice

- ☐ Other:_____

With regards to the practice pharmacist working within your practice please indicate the extent to which you agree or disagree with the following statements:

	Strongly Disagree	**Disagree**	**Neither Agree or Disagree**	**Agree**	**Strongly Agree**
The professional communication between myself and the pharmacist is open and honest.					
The pharmacist is open to working together with me on patients' medication management.					
The pharmacist delivers high quality healthcare to patients					
The pharmacist has time to discuss with me matters relating to patients' medication regimens.					
The pharmacist meets the professional expectations I have of him/her.					
I can trust the pharmacist's professional decisions.					
The pharmacist actively addresses patients' medical concerns.					
The pharmacist and I have mutual respect for one another on a professional level.					
The pharmacist and I share common goals and objectives when caring for the patient.					
My role and the pharmacist's role in patient care are clear.					
I have confidence in the pharmacist's expertise in medicines and therapeutics.					
The pharmacist has a role in assuring medication safety (for example, to identify drug interactions, adverse reactions, contraindications etc).					
The pharmacist has a role in assuring medication effectiveness (for example, to ensure the patient receives the optimal drug at the optimal dose etc).					

How much do you feel a practice pharmacist should be remunerated (per hour) for the services provided?

$_____

COMMUNITY PHARMACIST FEEDBACK SURVEY

This survey is regarding a project being conducted in a medical centre exploring the role of pharmacists working in general practices. If you have had an interaction with a pharmacist working in a medical centre within the last 9 months, we would like to ask you some questions regarding your experience with the practice pharmacist during the project. The information you provide will remain anonymous.

With regards to your experience with the practice pharmacist working in a medical centre near you please indicate the extent to which you agree or disagree with the following statements:

	Strongly Disagree	**Disagree**	**Neither Agree or Disagree**	**Agree**	**Strongly Agree**
I believe integrating a pharmacist into a medical centre would be beneficial to patients					
Integrating a pharmacist into a medical centre would <u>not</u> be beneficial to community pharmacies					
Having a practice pharmacist in a medical centre improved communication between the medical centre and my community pharmacy					
Having a practice pharmacist in a medical centre improved continuity of care between the medical centre and community pharmacy					
I would prefer to contact the GP rather than the practice pharmacist to discuss a patient's care					
I was notified by the practice pharmacist when a patient had a hospital admission.					
I did <u>not</u> receive more professional service referrals (such as HMRs, MedsChecks, etc) when the practice pharmacist was working in the medical centre					
Pharmacists should have a more active role in the general practice environment					
I do <u>not</u> support pharmacists working within general practices
