**Supplemental Figure 1.** Progression effect and adjusted mean change from baseline for Global health status/QoL, EQ-5D utility and EQ VAS scores, by progression status in LUX-Lung 1 and LUX-Lung 3, investigator assessment.

**LUX-Lung 1**

- Global health status/QoL
- EQ-5D utility
- EQ VAS

**LUX-Lung 3**

- Global health status/QoL
- EQ-5D utility
- EQ VAS

Progression effect: *P < 0.01, **P < 0.05

Arrows indicate the direction of the mean change from baseline for Global health status/QoL, EQ-5D utility and EQ VAS scores in patients with and without progression at each assessment week.
