

STANDARD PROTOCOL ITEMS: RECOMMENDATIONS FOR INTERVENTIONAL TRIALS

SPIRIT 2013 Checklist: Recommended items to address in a clinical trial protocol and related documents\*

Section/item	Item No	Description
<b>Administrative information</b>		
Title	1	Descriptive title identifying the study design, population, interventions, and, if applicable, trial acronym ( <a href="#">page 1, line 1-3</a> )
Trial registration	2a	Trial identifier and registry name. If not yet registered, name of intended registry ( <a href="#">page 3, line 5</a> )
	2b	All items from the World Health Organization Trial Registration Data Set ( <a href="#">N/A</a> )
Protocol version	3	Date and version identifier ( <a href="#">page 23, line 1-2</a> )
Funding	4	Sources and types of financial, material, and other support ( <a href="#">page 22, line 14-17</a> )
Roles and responsibilities	5a	Names, affiliations, and roles of protocol contributors ( <a href="#">page 1, lines 4-17</a> ; <a href="#">page 22, line 1-4</a> )
	5b	Name and contact information for the trial sponsor ( <a href="#">page 22, lines 19-21</a> )
	5c	Role of study sponsor and funders, if any, in study design; collection, management, analysis, and interpretation of data; writing of the report; and the decision to submit the report for publication, including whether they will have ultimate authority over any of these activities ( <a href="#">page 22, lines 14-17</a> )
	5d	Composition, roles, and responsibilities of the coordinating centre, steering committee, endpoint adjudication committee, data management team, and other individuals or groups overseeing the trial, if applicable (see Item 21a for data monitoring committee) ( <a href="#">page 22, lines 6-12</a> ).
<b>Introduction</b>		
Background and rationale	6a	Description of research question and justification for undertaking the trial, including summary of relevant studies (published and unpublished) examining benefits and harms for each intervention ( <a href="#">page 5, line 21-25</a> ; <a href="#">page 6, line 1-19</a> )
	6b	Explanation for choice of comparators ( <a href="#">page 6, line 18-19</a> )

Objectives	7	Specific objectives or hypotheses ( <a href="#">page 6, line 20-24</a> ; <a href="#">page 7, line 1-7</a> )
Trial design	8	Description of trial design including type of trial (eg, parallel group, crossover, factorial, single group), allocation ratio, and framework (eg, superiority, equivalence, noninferiority, exploratory) ( <a href="#">page 7, line 9-11</a> )

### **Methods: Participants, interventions, and outcomes**

Study setting	9	Description of study settings (eg, community clinic, academic hospital) and list of countries where data will be collected. Reference to where list of study sites can be obtained ( <a href="#">page 7, line 17-19</a> )
Eligibility criteria	10	Inclusion and exclusion criteria for participants. If applicable, eligibility criteria for study centres and individuals who will perform the interventions (eg, surgeons, psychotherapists) ( <a href="#">page 8, line 4-19</a> )
Interventions	11a	Interventions for each group with sufficient detail to allow replication, including how and when they will be administered ( <a href="#">page 10, line 11-25</a> ; <a href="#">page 11-12</a> )
	11b	Criteria for discontinuing or modifying allocated interventions for a given trial participant (eg, drug dose change in response to harms, participant request, or improving/worsening disease) ( <a href="#">page 12, line 22-24</a> )
	11c	Strategies to improve adherence to intervention protocols, and any procedures for monitoring adherence (eg, drug tablet return, laboratory tests) ( <a href="#">page 10, line 21-25</a> )
	11d	Relevant concomitant care and interventions that are permitted or prohibited during the trial ( <a href="#">page 8, line 19</a> )
Outcomes	12	Primary, secondary, and other outcomes, including the specific measurement variable (eg, systolic blood pressure), analysis metric (eg, change from baseline, final value, time to event), method of aggregation (eg, median, proportion), and time point for each outcome. Explanation of the clinical relevance of chosen efficacy and harm outcomes is strongly recommended ( <a href="#">page 13, line 7-25</a> ; <a href="#">page 14-17</a> )
Participant timeline	13	Time schedule of enrolment, interventions (including any run-ins and washouts), assessments, and visits for participants. A schematic diagram is highly recommended (see Figure) ( <a href="#">Figure 1</a> )
Sample size	14	Estimated number of participants needed to achieve study objectives and how it was determined, including clinical and statistical assumptions supporting any sample size calculations ( <a href="#">page 17, line 17-23</a> ; <a href="#">page 1-7</a> )

Recruitment 15 Strategies for achieving adequate participant enrolment to reach target sample size ([page 7, line 22-24](#))

### Methods: Assignment of interventions (for controlled trials)

#### Allocation:

- Sequence generation 16a Method of generating the allocation sequence (eg, computer-generated random numbers), and list of any factors for stratification. To reduce predictability of a random sequence, details of any planned restriction (eg, blocking) should be provided in a separate document that is unavailable to those who enrol participants or assign interventions ([page 10, line 6-7](#))
- Allocation concealment mechanism 16b Mechanism of implementing the allocation sequence (eg, central telephone; sequentially numbered, opaque, sealed envelopes), describing any steps to conceal the sequence until interventions are assigned ([page 10, line 5-6](#))
- Implementation 16c Who will generate the allocation sequence, who will enrol participants, and who will assign participants to interventions ([page 10, line 7-9](#))
- Blinding (masking) 17a Who will be blinded after assignment to interventions (eg, trial participants, care providers, outcome assessors, data analysts), and how ([N/A; page 10, line 5-6](#))
- 17b If blinded, circumstances under which unblinding is permissible, and procedure for revealing a participant's allocated intervention during the trial ([N/A](#))

### Methods: Data collection, management, and analysis

- Data collection methods 18a Plans for assessment and collection of outcome, baseline, and other trial data, including any related processes to promote data quality (eg, duplicate measurements, training of assessors) and a description of study instruments (eg, questionnaires, laboratory tests) along with their reliability and validity, if known. Reference to where data collection forms can be found, if not in the protocol ([page 13-17; page 19, line 25](#))
- 18b Plans to promote participant retention and complete follow-up, including list of any outcome data to be collected for participants who discontinue or deviate from intervention protocols ([page 13, line 1-5](#))
- Data management 19 Plans for data entry, coding, security, and storage, including any related processes to promote data quality (eg, double data entry; range checks for data values). Reference to where details of data management procedures can be found, if not in the protocol ([page 20, line 1-7](#))

- Statistical methods
- 20a Statistical methods for analysing primary and secondary outcomes. Reference to where other details of the statistical analysis plan can be found, if not in the protocol ([page 18, line 15-20](#))
- 20b Methods for any additional analyses (eg, subgroup and adjusted analyses) ([page 19, line 1-20](#))
- 20c Definition of analysis population relating to protocol non-adherence (eg, as randomised analysis), and any statistical methods to handle missing data (eg, multiple imputation) ([page 18, line 22-24](#))

### Methods: Monitoring

- Data monitoring
- 21a Composition of data monitoring committee (DMC); summary of its role and reporting structure; statement of whether it is independent from the sponsor and competing interests; and reference to where further details about its charter can be found, if not in the protocol. Alternatively, an explanation of why a DMC is not needed ([page 20, line 9-11](#))
- 21b Description of any interim analyses and stopping guidelines, including who will have access to these interim results and make the final decision to terminate the trial ([N/A](#))
- Harms
- 22 Plans for collecting, assessing, reporting, and managing solicited and spontaneously reported adverse events and other unintended effects of trial interventions or trial conduct ([page 21, line 8-10](#))
- Auditing
- 23 Frequency and procedures for auditing trial conduct, if any, and whether the process will be independent from investigators and the sponsor ([N/A](#))

### Ethics and dissemination

- Research ethics approval
- 24 Plans for seeking research ethics committee/institutional review board (REC/IRB) approval ([page 21, line 1-3](#))
- Protocol amendments
- 25 Plans for communicating important protocol modifications (eg, changes to eligibility criteria, outcomes, analyses) to relevant parties (eg, investigators, REC/IRBs, trial participants, trial registries, journals, regulators) ([page 21, line 5-6](#))
- Consent or assent
- 26a Who will obtain informed consent or assent from potential trial participants or authorised surrogates, and how (see Item 32) ([page 21, line 4-5](#))
- 26b Additional consent provisions for collection and use of participant data and biological specimens in ancillary studies, if applicable ([N/A](#))
- Confidentiality
- 27 How personal information about potential and enrolled participants will be collected, shared, and maintained in order to protect confidentiality before, during, and after the trial ([page 20, line 1-7](#))

Declaration of interests	28	Financial and other competing interests for principal investigators for the overall trial and each study site ( <a href="#">page 22, line 3-4</a> )
Access to data	29	Statement of who will have access to the final trial dataset, and disclosure of contractual agreements that limit such access for investigators ( <a href="#">page 20, line 4-5</a> )
Ancillary and post-trial care	30	Provisions, if any, for ancillary and post-trial care, and for compensation to those who suffer harm from trial participation ( <a href="#">N/A</a> )
Dissemination policy	31a	Plans for investigators and sponsor to communicate trial results to participants, healthcare professionals, the public, and other relevant groups (eg, via publication, reporting in results databases, or other data sharing arrangements), including any publication restrictions ( <a href="#">page 21, line 12</a> )
	31b	Authorship eligibility guidelines and any intended use of professional writers ( <a href="#">N/A</a> )
	31c	Plans, if any, for granting public access to the full protocol, participant-level dataset, and statistical code ( <a href="#">N/A</a> )
<b>Appendices</b>		
Informed consent materials	32	Model consent form and other related documentation given to participants and authorised surrogates ( <a href="#">Supplementary Material 2</a> )
Biological specimens	33	Plans for collection, laboratory evaluation, and storage of biological specimens for genetic or molecular analysis in the current trial and for future use in ancillary studies, if applicable ( <a href="#">N/A</a> )

---

\*It is strongly recommended that this checklist be read in conjunction with the SPIRIT 2013 Explanation & Elaboration for important clarification on the items. Amendments to the protocol should be tracked and dated.
