

LPG refills rates. We collected records of refills between mid-August 2017 and mid-August 2018 (Table 3). Households refilled their LPG cylinders 6.4 times on average (SD: 4), with a range between 1 and 14 refills. Refill records spanned a period of on average 261 days (SD: 98). The average time to first refill was 41 days (SD 50); the average time between subsequent refills was 48 days (SD 43). **Table S1. Refill patterns through mid-September 2018.**

Number of Refills					Days Until First Refill		Avg. Days Between Subsequent Refills	
Average	SD	Min	Max	Average Monitored Days	Avg	SD	Avg	SD
6.4	4.0	1	14	261	41	50	48	43
