

Supplementary Table 2. Adjusted predictions for the proportion of wives undergoing therapy, classified according to age group and the presence or absence of their husbands undergoing therapy for the same disease (2)

Disease	Odds ratio	95%CI	
Hypertension	1.79	1.72	1.86
Diabetes	1.45	1.33	1.57
Dyslipidaemia	2.58	2.42	2.76
Any of 3 diseases	1.87	1.80	1.93

*Adjusted for residence areas, household expenditures, wives' ages, educational backgrounds, presence/absence of undergoing therapy for other diseases and its interaction with age groups.
