

Supplementary Table S1

Multiple logistic regression model for febrile seizure in children aged up to 3 years, born between 34 and 41 weeks of gestational age

	Odds ratio (95% confidence interval)	p
Sex, male	1.22 (1.16-1.29)	<0.001
Late preterm birth (34-36 weeks)	1.12 (0.99-1.26)	0.076
Low birth weight (<2500 g)	1.09 (0.99-1.20)	0.089

Supplementary Table S2

Multiple logistic regression model for seizures occurring in children aged up to 3 years, born between 34 and 41 weeks of gestational age

	Odds ratio (95% confidence interval)	p
Sex, male	1.15 (1.10-1.20)	<0.001
Late-preterm birth (34-36 weeks)	1.06 (0.95-1.19)	0.277
Low birth weight (<2500 g)	1.08 (0.99-1.17)	0.101
