

Appendix 1: Preliminary search strategies for published literature.

Title: Identifying Indicators Sensitive to Primary Healthcare Nurse Practitioner Practice: A Review of Systematic Reviews

Question: What indicators are sensitive to the practice of primary healthcare nurse practitioners (PHCNPs) from the patient, provider and health system perspectives?

Aim: To evaluate and synthesize systematic reviews to identify outcome indicators sensitive to the practice of primary PHCNPs from the patient, provider and health system perspectives.

Search Strategy:

- P:** Patients of any age, groups or communities receiving primary healthcare care in all types (e.g., teaching and non-teaching, public and private), sizes (e.g., small, medium, large) and locations (e.g., rural and urban) of community or care agencies (e.g., long-term care, primary care practices, home care).
= Search strategy concept 1: Primary Healthcare.
- I:** Care provided by PHCNPs in all sectors.
= Search strategy concept 2: Advanced Practice Nursing.
- C:** Data related to the comparator (i.e., control) group will be extracted to describe the group to which care is compared. Comparator groups can include usual care, care provided by another health care professional (e.g., physicians), best care, or adherence to clinical practice guideline.
- O:** Any outcome indicator that measures the effectiveness of PHCNPs. These measures include patient (e.g., health status, quality of life, patient satisfaction) or provider (e.g., quality of care, job satisfaction) or health system (e.g., length of hospital stay, rehospitalisation, resource use, costs) outcomes.
= Search strategy concept 3: Outcomes, comprised of 6 sub-concepts: 1) Quality/ Best practice; 2) Promotion; 3) Prevention; 4) Indicators; 5) Access; 6) Equity.
- S:** All relevant published and unpublished systematic reviews that were reported from 2010 and onwards with no restrictions on jurisdiction or language.
= Search strategy concept 4. NB: This component of the search strategy is based on part of the CADTH hedge for systematic reviews and meta-analyses (<https://www.cadth.ca/resources/finding-evidence/strings-attached-cadths-database-search-filters#sys>) combined with the hedge developed by Lunny C. et al. for overviews of reviews (Journal of Clinical Epidemiology 2016; 74: 107-118).
