Correction: Was the risk of death among the population of teachers and other school workers in England and Wales due to COVID-19 and all causes higher than other occupations during the pandemic in 2020? an ecological study using routinely collected data on deaths from the Office for National Statistics

Lewis SJ, Dack K, Relton CL, *et al.* Was the risk of death among the population of teachers and other school workers in England and Wales due to COVID-19 and all causes higher than other occupations during the pandemic in 2020? An ecological study using routinely collected data on deaths from the Office for National Statistics. *BMJ Open* 2021;11:e050656. doi:10.1136/bmjopen-2021-050656

This article was previously published with an error.

The figures published in the paper were same as those in the supplemental material. The correct figures are provided below:

Figure 1 Scatterplot of mortality rate (per 100 000) for COVID-19 and all other causes of death for men, using ageadjusted mortality rates between 9 March and 28 December 2020 from the Office for National Statistics. Unlabelled data points represent occupational groups in online supplemental table S4. Pearson's correlation coefficient=0.78, $p=1.4\times 10^{-11}$.

Figure 2 Scatterplot of mortality rate (per 100 000) for COVID-19 and all other causes of death for women, using age-adjusted mortality rates between 9 March and 28 December 2020 from the Office for National Statistics. Unlabelled data points represent occupational groups in online supplemental table S5. Pearson's correlation coefficient=0.88, $p=1.7\times 10^{-09}$.
