Interview guide

Project: Impact of the COVID-19 pandemic on asthma control among children: a qualitative study from the perspectives and experiences of caregivers

1. Can you subjectively evaluate your child’s asthma control status, has the status changed since the outbreak?

2. What are your perspectives on asthma control during COVID-19 and have your views changed since the outbreak?

3. What impacts has the COVID-19 and lockdown had on your child's asthma control and in what ways has asthma control changed?

4. How do you manage your child's asthma during the COVID-19 outbreak?
