Inclusion

All Danish Citizens ≥30 years old with incident atrial fibrillation in the period 1th May 1999 to 31th December 2015 (n = 258 086)

Exclusion

Low risk of stroke (n = 36 876)
Medium risk of stroke (n = 59 530)

Remaining participants (n = 161 680)

Exclusion

Valvular atrial fibrillation (n = 2409)

Remaining participants (n = 159 271)

Exclusion

Missing cohabiting status (n = 379)
Missing income (n = 4149)
Missing residence (n = 295)

Total study population (n = 154 448)
