**Supplementary Figure 1:** Diagram showing the level of coordination of public information campaigns on COVID-19 in the five study countries.

Levels of coordination: 0 = no COVID-19 public information campaign; 1 = public officials urging caution about COVID-19; 2 = coordinated public information campaign (e.g. across traditional and social media). All countries ran public information campaigns at level 2 during the study period from 1st May to 30th June 2020. Data was provided by the Oxford COVID-19 Government Response Tracker17 and downloaded from ‘Our World in Data’19.
