

## Braun &amp; Clarke 15-point Thematic Analysis Checklist

Process	No.	Criteria	Response
Transcription	1	The data have been transcribed to an appropriate level of detail, and the transcripts have been checked against the tapes for 'accuracy'	Both focus group transcripts transcribed to an appropriate level of detail and checked against tapes.
Coding	2	Each data item has been given equal attention in the coding process	We reviewed all quotations to generate coding.
	3	Themes have not been generated from a few vivid examples (an anecdotal approach), but instead the coding process has been thorough, inclusive and comprehensive	Themes, and the findings described herein, were developed from a complete coding process of the entire dataset. The coding process was thorough, inclusive and comprehensive, as all quotations were used to generate codes, and develop themes. Each theme was developed based on numerous codes gathered across a range of articles and participants quotations.
	4	All relevant extracts for all each theme have been collated	Yes.
	5	Themes have been checked against each other and back to the original data set	Yes.
	6	Themes are internally coherent, consistent, and distinctive	Yes.
Analysis	7	Data have been analysed- interpreted, made sense of- rather than just paraphrased or described	Yes, evident from the results.
	8	Analysis and data match each other- the extracts illustrate the analytic claims	The analysis and findings from it closely match the data set.
	9	Analysis tells a convincing and well-organised story about the data and topic	Yes.
	10	A good balance between analytical narrative and illustrative extracts is provided	Yes. Illustrative extracts have been used within the results section.
Overall	11	Enough time has been allocated to complete all phases of the analysis adequately, without rushing a phase or giving it a once-over-lightly	Yes.
Written report	12	The assumptions about, and specific approach to, thematic analysis are clearly explicated	Yes, stated in the methods section.
	13	There is good fit between what you claim you do, and what you show you have done- i.e. described method and reported analysis are consistent	Yes.

	14	The language and concepts used in the report are consistent with the epistemological position of the analysis	Yes.
	15	The researcher is positioned as <i>active</i> in the research process; themes do not just 'emerge'	Yes.
