

## **Additional file 2.** Data extraction form to be piloted

### **Inclusion criteria**

Study designs: qualitative, quantitative and mixed methods studies

Types of studies: empirical or conceptual research

Phenomenon of interest: definitions, conceptualisations, measurements and/or operationalisations of community empowerment

Intervention: community empowerment for health promotion and/or health outcomes Setting: global

### **Study details:**

Title: \_\_\_\_\_

First author: \_\_\_\_\_

Publication date: \_\_\_\_\_

Study design (e.g. qualitative, quantitative, mixed): \_\_\_\_\_

Study aim: \_\_\_\_\_

Type of study (e.g. empirical or conceptual): \_\_\_\_\_

Type of data (e.g. themes, concepts, descriptive statistics, statistical models): \_\_\_\_\_

Country and setting (e.g. rural or urban, community, healthcare facility): \_\_\_\_\_ Funding

(i.e. declaration of conflict of interest): \_\_\_\_\_

### **Study content:**

#### *Phenomenon of interest:*

- Definition or description of community empowerment
- Concept, theory, framework or model of community empowerment
- Measurements, indicators, outcomes, interventions and evaluations of community empowerment
- Relationship between community empowerment and health promotion and/or health outcomes

#### *Other information (participants, context and the phenomenon of interest or intervention):*

- Study participants and selection

- Contextual factors affecting community empowerment (e.g. barriers and facilitators to interventions or programmes)
- Activities, processes, components and any other characteristics of community empowerment

*Methodology:*

- Data collection methods (including tools and materials used)
- Data analysis methods (including approach used)

*Which aspect of the synthesis does this study contribute towards?*

- Objective 1: definition and/or concept used to describe community empowerment in the context of health promotion
- Objective 2: description and/or assessment of how community empowerment is operationalised (i.e. indicators and interventions of community empowerment) in the context of health promotion
- Objective 3: description of the relationship between community empowerment and health promotion and/health outcomes
- Other useful contribution to the synthesis  Specify: \_\_\_\_\_
