Figure S1. ASIR and ASMRs in 21 GBD regions for cervical cancer by SDI, from 1990 to 2019. The blue line represents the expected values of ASRs for each value of SDI. ASIR, age-standardized incidence rate; ASMR, age-standardized mortality rate; ASR, age-standardized rate; SDI, socio-demographic index.
**Figure S2.** Absolute number of deaths due to cervical cancer for 21 GBD regions, from 1990 to 2019.
Figure S3. Trends in age-standardized incidence and death rates per 100,000 for cervical carcinoma, globally and by SDI regions, with JoinPoint regression. SDI, socio-demographic index.
**Figure S4.** The mortality rates in 2019 (A) and AAPC from 1990 to 2019 (B) of cervical cancer in different age groups at global, regional, and national levels. Error bars indicate 95% uncertainty intervals. AAPC, average annual percentage change; SDI, socio-demographic index.
