## COREQ (COnsolidated criteria for REporting Qualitative research) Checklist

A checklist of items that should be included in reports of qualitative research. You must report the page number in your manuscript where you consider each of the items listed in this checklist. If you have not included this information, either revise your manuscript accordingly before submitting or note N/A.

Domain 1: Research team         6           and reflexivity         6           Personal characteristics         1           Interviewer/facilitator         1         Which author/s conducted the interview or focus group?         1           Credentials         2         What was their occupation at the time of the study?         1           Gender         4         Was the researcher male or female?         1           Experience and training         5         What experience or training did the researcher have?         8           Relationship established         6         Was a relationship established prior to study commencement?         8           Relationship established         7         What did the participants know about the researcher? e.g. personal the interviewer         9           Interviewer characteristics         8         What characteristics were reported about the inter viewer/facilitator? e.g. Bis, assumptions, reasons and interests in the research topic         15           Omain 2: Study design         7         What methodological orientation was stated to underpin the study? e.g. and Theory         8           Participant selection         9         What methodological orientation was stated to underpin the study? e.g. angal final         8           Method of approach         11         How were participants selected? e.g. purposive, convenience, consecutive, snowball <th>Торіс</th> <th>Item No.</th> <th>Guide Questions/Description</th> <th>Reported on Page No.</th>	Торіс	Item No.	Guide Questions/Description	Reported on Page No.
Personal characteristics       1       Which author/s conducted the interview or focus group?       1         Interviewer/facilitator       1       Which author/s conducted the interview or focus group?       1         Credentials       2       What were the researcher is credentials? E.g. PhD, MD       1         Occupation       3       What was their occupation at the time of the study?       1         Gender       4       Was the researcher male or female?       1         Experience and training       5       What experience or training did the researcher have?       6         Relationship with participants       5       8       1       6         Participant Knowledge of       7       What did the participants know about the researcher? e.g. personal goals, reasons for doing the research       1       1         Damin 2: Study design       1       1       1       1       1         Theoretical framework       8       What characteristics were reported about the interviewer/facilitator?       6       6         and Theory       grounded theory, discourse analysis, ethnography, phenomenology, content analysis       6       6         Participant selection       9       What methodological orientation was stated to underpin the study? e.g. grounded theory, discourse analysis, ethnography, phenomenology, content analysis       6	Domain 1: Research team			<b>.</b>
Personal characteristics       1       Which author/s conducted the interview or focus group?       1         Interviewer/facilitator       1       Which author/s conducted the interview or focus group?       1         Credentials       2       What were the researcher is credentials? E.g. PhD, MD       1         Occupation       3       What was their occupation at the time of the study?       1         Gender       4       Was the researcher male or female?       1         Experience and training       5       What experience or training did the researcher have?       6         Relationship with participants       5       8       1       6         Participant Knowledge of       7       What did the participants know about the researcher? e.g. personal goals, reasons for doing the research       1       1         Damin 2: Study design       1       1       1       1       1         Theoretical framework       8       What characteristics were reported about the interviewer/facilitator?       6       6         and Theory       grounded theory, discourse analysis, ethnography, phenomenology, content analysis       6       6         Participant selection       9       What methodological orientation was stated to underpin the study? e.g. grounded theory, discourse analysis, ethnography, phenomenology, content analysis       6	and reflexivity			6
Credentials       2       What were the researcher's credentials? E.g. PhD, MD         Occupation       3       What was their occupation at the time of the study?         Gender       4       Was the researcher male or female?         Experience and training       5       What experience or training did the researcher have?         Relationship with       5       What experience or training did the researcher have?         Relationship established       6       Was a relationship established prior to study commencement?         Participant knowledge of       7       What that carceristics were reported about the inter viewer/facilitator?         e.g. Bias, assumptions, reasons and interests in the research topic       15         Domain 2: Study design       7         Theoretical framework       6         Methodological orientation and the orient analysis       6         Participant selection       9         Sampling       10         How were participants selected? e.g. purposive, convenience, consecutive, snowball       6         Method of approach       11         How many participants were in the study?       6         Sample size       12       How many participants were in the study?       6         Setting of data collection       14       Where was thed ac collected? e.g. home, clinic, workpl				
Credentials       2       What were the researcher's credentials? E.g. PhD, MD         Occupation       3       What was their occupation at the time of the study?         Gender       4       Was the researcher male or female?         Experience and training       5       What experience or training did the researcher have?         Relationship with       5       What experience or training did the researcher have?         Relationship established       6       Was a relationship established prior to study commencement?         Participant knowledge of       7       What that carceristics were reported about the inter viewer/facilitator?         e.g. Bias, assumptions, reasons and interests in the research topic       15         Domain 2: Study design       7         Theoretical framework       6         Methodological orientation and the orient analysis       6         Participant selection       9         Sampling       10         How were participants selected? e.g. purposive, convenience, consecutive, snowball       6         Method of approach       11         How many participants were in the study?       6         Sample size       12       How many participants were in the study?       6         Setting of data collection       14       Where was thed ac collected? e.g. home, clinic, workpl	Interviewer/facilitator	1	Which author/s conducted the interview or focus group?	
Occupation       3       What was their occupation at the time of the study?       Image: Construction of the study?         Gender       4       Was the researcher male or female? findings			/	
Data analysis			7	
Number of data coders	24	How many data coders coded the data?		
Description of the coding	25	Did authors provide a description of the coding tree?		
tree			7	
Derivation of themes	26	Were themes identified in advance or derived from the data?	7	
Software	27	What software, if applicable, was used to manage the data?		
Participant checking	28	Did participants provide feedback on the findings?		
Reporting			Append	lix 3
Quotations presented	29	Were participant quotations presented to illustrate the themes/findings?		
		Was each quotation identified? e.g. participant number	8-14	
Data and findings consistent	30	Was there consistency between the data presented and the findings?	8-14	
Clarity of major themes	31	Were major themes clearly presented in the findings?	12	
Clarity of minor themes	32	Is there a description of diverse cases or discussion of minor themes?		

Developed from: Tong A, Sainsbury P, Craig J. Consolidated criteria for reporting qualitative research (COREQ): a 32-item checklist for interviews and focus groups. *International Journal for Quality in Health Care*. 2007. Volume 19, Number 6: pp. 349 – 357

Once you have completed this checklist, please save a copy and upload it as part of your submission. DO NOT include this checklist as part of the main manuscript document. It must be uploaded as a separate file.
