

Correction: Mapping the evidence on identity processes and identity-related interventions in the smoking and physical activity domains: a scoping review protocol

Penforinis KM, Van Vliet MHM, Meijer E, *et al.* Mapping the evidence on identity processes and identity-related interventions in the smoking and physical activity domains: a scoping review protocol. *BMJ Open* 2022;12:e058405. doi: 10.1136/bmjopen-2021-058405

This article was previously published with an error.

The reference citation 32 in 3rd paragraph of the Introduction section mistakenly referred to an empirical article published by Dr. Tombor in the same year instead of the intended meta-ethnography. The correct reference (below) has now been included in the article.

Tombor I, Shahab L, Herbec A, *et al.* Smoker identity and its potential role in young adults' smoking behavior: a meta-Ethnography. *Health Psychol* 2015;34:992–1003.

The second error pertains to two arguments made on the basis of the meta-analysis by Rhodes *et al* in 2016 in third paragraph of the Introduction section. On review, it became apparent that the meta-analysis does not only review qualitative data, nor does it look at young adults and youth only. The sentence has therefore been corrected as follows:

However, these articles are either outdated,¹⁹ review primarily quantitative data,⁴⁰ look only at young adults or youth,³⁹ or study multiple addictive substances altogether.⁴¹
