

Supplementary Table

Attrition bias analysis between responders and non-responders on a basis of smoking status and gender

	Responders	Non-responders	Chi square (p)
Smokers			
Males	160	23	
Females	156	14	
Nonsmokers			
Males	252	53	
Females	304	35	
Subtotal smokers	316	37	2.11 (0.15)
Subtotal nonsmokers	556	88	
Subtotal males	412	76	8.00 (0.01)
Subtotal females	460	49	
Total	872	125	

LEGEND: Note that group of non-responders does not include participants who were not present at the baseline testing (49 participants) but includes those who used inconsistent identification codes at testing waves (20 participants)
