NPT Construct	NPT Component	Questions
Coherence	Differentiation	How does what is delivered in the training differ from what is understood to be normal service?
	Communal Specification	How do the team view nutrition screening and treatment in the context of wider care provided by ICT/OPMH/JET? Does the training seek to alter this?
	Individual Specification	How do PDDG members view ICT/OPMH/JET team members' understandings of the work associated with nutrition screening and treatment? Are they looking to change anything?
	Internalisation	How do PDDG members view ICT/OPMH/JET team members' assessment of the value of screening and treatment for malnutrition?
Cognitive Participation	Initiation	How do PPDG members understand key participants for screening and treatment of malnutrition? Is the new procedure seeking to change this?
	Enrolment	Do the PDDG have any beliefs about relationships within teams and their effects on nutrition screening and treatment, and are they looking to change this?
	Legitimation	How, if at all, do PDDG members perceive the social processes involved in screening and treatment for malnutrition, and how these may relate to
	Activation	How do PDDG members view the position of ICT/OPMH/JET in relation to other services and HCP groups, with respect to nutrition screening and treatment? How (if at all) has this affected development and implementation of the training?

		How, if at all, do PDDG members view processes within teams as relating to nutrition screening and treatment? Have these been integrated into the design and implementation of training?
Collective action	*Interactional workability*	*How do PDDG members describe their expectations of the use and recording of screening tools, and the planning, enactment and integration within care of treatment options, for malnutrition?*
	Relational integration	*How do PDDG staff view the confidence of ICT/OPMH/JET team members in screening and treatment options for malnutrition? Has this affected the design and/or implementation of the training?*
	Skill set workability	*How do PDDG members view the relationship between different HCP skills sets and screening and treatment for malnutrition? How was this integrated into the development and/or implementation of the training?*
	Contextual integration	*What resources, practices, and technologies do ICT staff believe are made use of in screening and treatment of malnutrition for ICT/OPMH/JET teams? Has this affected the design and/or implementation of the training?*
Reflexive monitoring	*Systematisation*	*How, if at all, do PDDG members believe that effectiveness of screening and treatment for malnutrition takes place within ICT/OPMH/JET teams? How, if at all, has this affected development and implementation of the training?*

	Communal appraisal	*How, if at all, do PDDG members believe that ICT/OPMH/JET teams appraise the value and utility of nutrition screening and treatment (e.g. through appraisals, case conferences, team meetings etc.)? How, if at all, has this affected the design and/or implementation of the training?*
	Individual appraisal	*How, if at all, do PDDG members believe that ICT//OPMH/JET teams appraise the value and utility of nutrition screening and treatment individually? How, if at all, has this affected development and/or implementation of the training?*
	Reconfiguration	*Do the PDDG believe that modifications have been made to standard practice for screening and treatment of malnutrition? How, if at all, has this affected the design and/or implementation of the training?*
