

**Supplementary Figure 1: Age specific PSA used for prostate cancer screening in Australia from 2001 to 2012**

Note:

1. Data for PSA used specifically for screening are only available from 2001. Medicare Benefit Schedule item number 66655 may be used to make claims for one Prostate specific antigen test done in a 12 month period, and is differentiated from item number 66656 that may be used for monitoring after a diagnosis of prostatic disease (including after a diagnosis of prostate cancer).(25)
