Patient experience assessment sheet

Please state your the opinion regarding the blood pressure measurement test by showing to the research nurse the face that reflex your opinion on the following issues.

Comfort. How did you feel when you performed the test, only the test (not the attention of the nurses).

What do you think of the time that the test required to?
RECOMMENDATION:

After having performed the four tests. If all four were the same and you had to recommend them to other patient, how would you order them? First goes the test that I would recommend (1), and the last number (4) the one you would recommend the least.

A. 1 hour. _______
B. 3 consultations _______
C. 24 hours device. _______
D. In home or pharmacy measurement _______
