

**Supplemental Table B: Logistic regression model of Child smart-phone time (some vs. none) predicted by parental smart-phone time, parental attitudes and media equipment (n = 733)\***

	<b>OR</b>	<b>95% CI</b>	<b>P</b>
Parental smart-phone time (some – ref = none)	1.20	0.85 to 1.69	0.302
# SV items in house	1.43	1.26 to 1.62	<b>&lt;0.001</b>
# SV items in child bedroom	1.34	1.18 to 1.52	<b>&lt;0.001</b>
SV is valuable family time	1.04	0.86 to 1.25	0.668
SV keeps children entertained	1.06	0.87 to 1.29	0.546
SV is relaxing for children	0.97	0.79 to 1.19	0.749
SV helps to educate children	1.06	0.85 to 1.31	0.620

**\*\* Models are all mutually adjusted for the variables listed above as well as parental education, parental age and number of children**

**SV = Screen-viewing**
