

## Supplement 2

---

Title: Cohort profile: LifeLines DEEP, a prospective, general population cohort study in the northern Netherlands – study design and baseline characteristics

Journal: BMJ Open

Authors: Ettje F. Tigchelaar, Alexandra Zhernakova, Jackie A.M. Dekens, Gerben Hermes, Agnieszka Baranska, Zlatan Mujagic, Morris A. Swertz, Angélica M. Muñoz, Patrick Deelen, Maria C. Cénit, Lude Franke, Salome Scholtens, Ronald P. Stolk, Cisca Wijmenga, Edith J.M. Feskens

---

Table S1. Overview of collected data in LifeLines and source it originates from. More detailed information has been described by Scholtens et al. (2014) and is available through the LifeLines data catalog [[www.lifelines.net](http://www.lifelines.net)]

LifeLines	
Data	Source
24h urine biochemistry	Assessed by trained technician
Blood basic chemistry	Assessed by trained technician
Anthropometry	Examined by trained physician assistant
Blood pressure	Examined by trained physician assistant
Cognitive functioning	Examined by trained physician assistant
Electrocardiogram	Examined by trained physician assistant
Pulmonary function	Examined by trained physician assistant
Demographics	Questionnaire
Education	Questionnaire
Food intake	Questionnaire
Health status	Questionnaire
Medication use	Questionnaire
Physical activity	Questionnaire
Quality of life	Questionnaire
Smoking	Questionnaire
