

Appendix 2
Factors examined in determining quality rating

Author, date, country	
Study design	Quantitative/Qualitative:
	Type (RCT, etc.):
Major aim(s)	
Who participants are	N:
	Type (student, pharmacist, etc.):
	Demographics
	Age:
	Sex:
	Ethnicity:
SES:	
Recruitment	How recruited:
	Who excluded:
How perceptions assessed	Interview, questionnaire, archives, etc:
	Quality of questions/response options:
Which perceptions assessed	
Statistical approach (type of test/s) used	
Major finding(s)	Author main conclusions:
	% agreement, or similar:
	Effect size(s), if available:
	Additional notes:
Quality summary (study overall)	High/acceptable/poor:
	Additional notes:
