COVID-19 VACCINATION Survey

Please consider spending a few moments completing this questionnaire about COVID-19 vaccination.

What is this survey about?
COVID-19 has quickly become a major disease across the world. It has led to researchers from across the world to find a vaccine. A vaccine teaches your immune system how to create antibodies that protect you from an infectious disease such as COVID-19. Vaccines are used as a way to prevent disease, rather than treat a disease once you may have caught it.

This aim of this survey is to help us better understand the views of people across the country in relation to vaccines. We would like to hear the views from everyone. Your views on vaccines and whether you would consider taking part in vaccine related research studies. This survey will also help us to explore how we can promote vaccines and how we can help everyone to take part in vaccine research studies. The data from this survey will also help to target education and public health campaigns in the West Midlands and across the country.

All the information you provide will remain anonymous and will be stored securely. The information you provide will only be used for research purpose.

Who should complete the questionnaire?
This survey is for everyone living in the West Midlands and across the country
