

PROVIDER PROFILING	
Record ID	
SURVEY RESPONDENT	
Are you medically qualified?	Yes
	No
What is your medical qualification?	Resident
	Staff
Number of years of your expertise	
HOSPITAL CHARACTERISTICS	
Type of healthcare facility	Government
	Private
Type of hospital	Primary-level hospital
	Secondary-level hospital
	Tertiary-level hospital
City	
NEUROSURGERY DEPARTMENT CHARACTERISTICS	
Total number of beds dedicated to neurosurgical patients	
Does your neurosurgical unit manage just adults, just children or both?	Adults only
	Children only
	Both
Number of members of your department	
Number of theatres scheduled per week	
Number of craniotomies done in the last year	
Number of spinal surgeries done in the last year	
Number of urgent surgeries done in the last year	
Is there at least one staff neurosurgeon on call everyday?	Yes
	No
Is your institution the unit that manages cerebrovascular emergencies?	Yes, we manage all cerebrovascular emergencies referred to us
	Yes, but there is a
	No, we routinely transfer such cases to a different centre
Is your institution the unit that manages severe TBI and Spinal cord Injury emergencies?	Yes, we manage all emergencies referred to us
	No, we routinely transfer such cases to a different centre
STRATEGIES DEVELOPED TO DEAL WITH COVID-19 PANDEMIC	
What is the maximum percentage of total beds occupation to COVID patients during the pandemic?	<20%
	20-50%
	50-80%
	>80%
Do you routinely perform screening of COVID-19 infection before elective surgery?	Yes, in all cases
	Yes, but only in the case of suspicion
	No

What type of test do you usually use at your institution?	Structured questionnaire
	Swab test
	CT thorax
What is the time period considered valid between the test and the surgery ?	24h
	48-72h
	>72h
