

Appendix II: Data extraction instrument

Evidence Source Characteristics	
Authors	
Year	
Title of the report	
Type of publication (e.g., manuscript, webpage)	
Local of publication (e.g., website, journal, and if available, volume, issue, page and DOI)	
Methods	
Design adopted (e.g., cross-sectional survey)	
Country of publication	
Sample / Population (if applicable)	
Procedures (e.g., interviews, tools, institutional indicators, data analysis)	
Study Data	
Aim/Purpose	
Aspects mentioned about physiologic process of dying after WLSM	
Tools for prediction of death timing after WLSM <i>(if available, include details such as: was the tool validated? what are the aspects of death used for prediction?)</i>	
The impact of death timing after WLSM on family members <i>(if available, include details such as: end-of-life experiences of family members, planning for ceremonials, etc.)</i>	
The impact of death timing after WLSM on healthcare workers <i>(if available, include details such as: impact in their daily activities, emotional impact, etc.)</i>	
The impact of death timing after WLSM on the organ donation process <i>(if available, include details such as: challenges in the process and overall outcomes from donation, etc.)</i>	
Study/Report limitations stated by the author(s)	
Author's overall suggestion for future studies	
Other notes
