

Supplemental Material

S2. Specific analyses, methods and descriptors/estimators

| Approach | Subgroup of analyses | Type of analysis | Data source | Descriptor/Estimator |
|--------------|---------------------------|----------------------|--|---|
| Quantitative | First assessment analyses | Descriptive | Scores from all quantitative measures (CORE-OM, YP-CORE, LSS, TAS, CAP, SCORE-15); CORE-A-TAF and CORE-A-EoT sociodemographic and clinical variables | Frequencies, median, mean, bootstrapped confidence intervals, range, standard deviation |
| | | Acceptability | All quantitative measures | Rate of completed items per measure |
| | | Internal consistency | All quantitative measures | Cronbach's alpha McDonald's omega |

| | | | | |
|--|---------------------------------------|---|--|---|
| | | Correlations and associations | All quantitative measures, gender, age and education level | Pearson R Spearman rho Mean differences Hedges <i>g</i> |
| | Trajectories and predictors of change | Trajectories of change | Scores from measures used at least thrice (CORE-10, YP-CORE, APQ, SCORE-15, TAS) | Cat's cradle plots and Violin plots |
| | | Multilevel analyses | CORE measures: CORE-OM, CORE-10 and YP-CORE scores; therapist | Intrapersonal, intragroup and intergroup differences Random and fixed effects models Intraclass Correlation Coefficient |
| | | Growth analyses (contingent upon the fit of the study data) | CORE measures: CORE-10 and YP-CORE scores; APQ, SCORE-15, TAS scores; | Growth-Mixture Models Latent Class Growth Analysis |

| | | | | |
|-------------|------------------------------|---|--|--|
| | | to the model requirements) | sociodemographic and clinical variables from the CORE-A-TAF | |
| | | Outcome predictors | APQ, SCORE-15, TAS scores; sociodemographic and clinical variables from the CORE-A-TAF | Fixed effects from the MLM above |
| | Individual clients' outcomes | Individual clinical improvement and deterioration | CORE-OM, CORE-10 and YP-CORE scores | Reliable and Clinically Significant Change Reliable Trend Index |
| Qualitative | Content analyses | Framework analysis | Data from interviews | N/A |
