Supplementary Material 1: Reporting Checklist for Protocol of A Systematic Review and Meta-Analysis.

		Reporting Item	Page Number in Manuscript
Title			
Identification	<u>#1a</u>	Identify the report as a protocol of a systematic review	1
Update	<u>#1b</u>	If the protocol is for an update of a previous systematic review, identify as such	NA, It is a protocol for a new systematic review.
Registration			
	<u>#2</u>	If registered, provide the name of the registry (such as PROSPERO) and registration number	3
Authors			
Contact	<u>#3a</u>	Provide name, institutional affiliation, e-mail address of all protocol authors; provide physical mailing address of corresponding author	1
Contribution	<u>#3b</u>	Describe contributions of protocol authors and identify the guarantor of the review	18
Amendments			
	<u>#4</u>	If the protocol represents an amendment of a previously completed or published protocol, identify as such and list changes; otherwise, state plan for documenting important protocol amendments	NA, It is a protocol for a new systematic review.
Support			
Sources	<u>#5a</u>	Indicate sources of financial or other support for the review	18
Sponsor	<u>#5b</u>	Provide name for the review funder and / or sponsor	18
Role of sponsor or funder	<u>#5c</u>	Describe roles of funder(s), sponsor(s), and / or institution(s), if any, in developing the protocol	18
Introduction			
Rationale	<u>#6</u>	Describe the rationale for the review in the context of what is already known	5-7
Objectives	<u>#7</u>	Provide an explicit statement of the question(s) the review will address with	7-8

PiCO, study design, setting, time frame) and report characteristics (such as years considered, language, publication status) to be used as criteria for eligibility for the review Information sources #9 Describe all intended information sources (such as electronic databases, contact with study authors, trial registers or other grey literature sources) with planned dates of coverage 9 and Supplementary at least one electronic database, including planned limits, such that it could be repeated 9 and Supplementary Material 2 Study records - data management #11a Describe the mechanism(s) that will be used to manage records and data throughout the review 9 and Supplementary Material 2 Study records - selection process #11b State the process that will be used for selecting studies (such as two independent reviewers) through each phase of the review (that is, screening, eligibility and inclusion in meta- analysis) 10-11 studes (such as piloting forms, done independently, in duplicate), any processes for obtaining and confirming data from investigators 11-12 from reports (such as PICO items, funding sources), any pro-planned data assumptions and simplifications Outcomes and prioritization #11 List and define all outcomes for which data will be sought, including prioritization of main and additional outcomes, with rationale 11-12 risk of bias of individual studies, including whether this will be done at the outcome or study level, or both; state how this information will be used in data synthesis 11-12 becribe anticipated methods for assessing risk of bias of individual studies, including whether this will be done at the outcome or study level, or both; state how				
Eligibility criteria#8Specify the study characteristics (such as PICO, study design, setting, time frame) and report characteristics (such as years considered, language, publication status) to be used as criteria for eligibility for the review7-10Information#9Describe all intended information sources (such as electronic databases, contact with study authors, trial registers or other grey literature sources) with planned dates of coverage9 and Supplementary at least one electronic database, including planned limits, such that it could be repeated9 and Supplementary material 2Study records - data management#11a Describe the mechanism(s) that will be used to manage records and data throughout the review9 and Supplementary at least one independent reviewers) through each phase of the review (that is, screening, eligibility and inclusion in meta- analysis)10-11 studies (such as two independent reviewers) through each phase of the review (that is, screening, eligibility and inclusion in meta- analysis)11-12 from reports (such as PICO items, funding sources), any pre-planned data assumptions and additional outcomes for which data will be sought, including prioritization of main and additional outcomes for which data will be sought, including prioritization of main and additional outcomes or study level, or both; state how this information where this will be done at the outcome or study level, or both; state how this information will be used in data synthesis11-12 form reports (such as ploting forms, done investigatorsData items#12List and define all variables for which data will be sought, including prioritization of main and additional outcomes for which data will be sought,				
PICO, study design, setting, time frame) and report characteristics (such as years considered, language, publication status) to be used as criteria for eligibility for the review Information #9 Describe all intended information sources (such as electronic databases, contact with study authors, trial registers or other grey literature sources) with planned dates of coverage 9 and Supplementary at least one electronic database, including planned limits, such that it could be repeated 9 and Supplementary at least one electronic database, including planned limits, such that it could be repeated Study records - #11a Describe the mechanism(s) that will be used to manage records and data throughout the review 9 and Supplementary manage records and data throughout the review study study set (such as two independent reviewers) through each phase of the review (that is, screening, eligibility and inclusion in meta-analysis) Study records - #11b Describe planned method of extracting data tribe one base of the review (that is, screening, eligibility and inclusion in meta-analysis) Study records - #11c Describe planned method of extracting data tribe one base of the review (that is, screening, eligibility and inclusion in meta-analysis) Study records - #11c Describe planned data assumptions and simplifications Outcomes and prioritization #12 List and define all variables for which data will be sought (such as PICO items, funding sources), any pro-planned data assumptions and simplifications Outcomes and prioritization #13 <th>Methods</th> <th></th> <th></th> <th></th>	Methods
